FRIENDLY BACTERIA

NATURE'S MICROBIOME FOR
HEALTHY SOIL & THRIVING PLANTS

Krushi Amrut is a phosphate solubilizing fungal biofertilizer. It converts insoluble forms of phosphorus into soluble forms that plants can easily absorb. This process enhances phosphorus availability, promotes healthy root development and overall plant growth. It also helps in lowering soil pH, chelation and mineralization and protects plants by avoiding phytopathogens.

BENEFITS

- Improved Root Development
- Enhanced Plant Growth
- Reduced Need for Chemical Fertilizers
- Soil Health Improvement
- Increase Resistance To Diseases
- Suitable For All Type Of Crops

CAUTION

- Store in cool and dry place.
- Avoid direct heating or sunlight.

COMPATIBILITY

- Eco friendly and non-hazardous.
- Friendly with bio-fertilizers and bio-pesticides.

METHOD OF APPLICATION

- **Foliar Application :**
  Apply 2–4 ml of Krushi Amrut per liter of water at any life stage of crop.
- **Drenching Application :**
  Apply 2–4 ml of Krushi Amrut per liter of water at any life stage of crop.
- **Drip Irrigation :**
  Take 1 Ltr of Krushi Amrut along with 200 Ltr of water and apply in 1 acre of land.
- **Plant Treatment :**
  Mix 20 ml of Krushi Amrut with 2 Ltr of water and apply directly at the root zone of individual trees or vines.

PRODUCT SPECIFICATION

- Content : Phosphate Solubilizing Fungi
- Total Viable Cell Count : 1×10^7 CFU/ml
- Contamination : Nil
- pH : 3.5 to 5.5

RECOMMENDATION

- It can apply at any growth application.
- Repeat the application at every 10–15 days for best results.
