ABOUT

Tricho Shield is a beneficial fungus widely used for soil treatment that protects roots from root rot, wilt, damping-off and other soil-borne diseases and helps in promoting healthy root development and better yield.

COMPOSITION

Trichoderma Harzianum 9% w/w (min.)
(Eqv. to spores $2x10^6$ /gm minimum)
Carrier (Talc) q.s.

MECHANISM OF ACTION

Trichoderma Harzianum 9% w/w (min.) competes for food and space in the rhizosphere or on the root surface with other harmful fungi and parasitic fungi. This beneficial fungus colonizes the roots within 12 days and protects the roots for longer duration by preventing new infection. This beneficial fungus competes for space and nutrients with harmful fungi and kills them to protect the crop.

DOSAGE & APPLICATION

- Mix Tricho Shield @ 2 g/litre of water and drench near the root zone.
- Repeat this application after 30 days for better results.

CROPS

Use in all crops like vegetables, fruits, cereals, pulses, oilseeds, flowers, ornamental plants, etc.
